

# AGGRESSIVE IN SPOTS

Little Change in the Market From the Day Before.

## THE EFFECT OF LEGISLATION

Undisturbed Ease in the Money Market Clear Proof of Abundant Resources.

(By Associated Press)

**NEW YORK.** April 8.—To-day's stock market was similar in character to that of yesterday, with a few spots of aggressive strength and with a pressure to sell at other points for realization of profits. Dealings did not reach the recent average volume, and strong stocks were rather less effective in sustaining the market against the realizing at other points. To-day's conspicuous advances were in Al�on, Amalgamated Copper and Brooklyn Rapid Transit, and on a smaller volume of business, Consolidated Gas.

The movement in the latter was directly due to legislation at Albany. The movement in Al�on has been foreshadowed for several days, during which points have been published on Al�on's strong position of independence and the necessity of consolidating it in order to maintain any harmony of action in that field. The recent advance in Union Pacific pointed to a movement in Al�on also in connection with the bill of Al�on's consolidation. The appeal was ostensibly based on the many reports of the strong position of the copper trade.

The plain evidence of selling of Union Pacific and United Gas, however, helped to develop a market of what has been its most effective support, and other stocks, which have been successively advanced, were sold in the same way.

Heavy realising in the stocks of Steel Steel 24, 25, 26, the bond market irregular. Total sales \$2,650,000. United States 2's advanced 1-8, and the old 4's per cent. on call. Total sales of stocks were \$55,100 shares.

**COTTON MARKETS.**

New York, April 6.—The cotton market opened steady at an advance of 2½ points, following considerably better cables than expected, but there was little demand and very small sales. The general tendency was by the same interests who have recently been prominent on the bear side of the market, eased prices off to a little under the closing figures of the day, and the market closed with a movement and reports of a better spot demand from New Orleans, together with less favorable weather reports from the South, which helped to increase somewhat around mid-day by buying on the strong showing of the weekly figures.

In the early part of the afternoon another bear raid took place, driving May down to about 11-67 and July to 14-33, or about the closing prices of the previous night. This was followed by a large amount of buying, the result of a report of further increases somewhere around mid-day by buying on the strong showing of the weekly figures.
